

1

Insert bolts in pill-shaped slots.  
Then add washers and nuts.

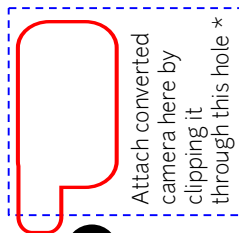

3

Align upper stage  
with bottom.

Camera lens should  
be flush with stage  
as shown.

Attach converted  
camera here by  
clipping it  
through this hole \*

2

This is an open hardware  
design, developed by  
hundreds of people  
working collaboratively.

CERN OHL 1.2

\* Visit [PublicLab.org/micro](https://PublicLab.org/micro) for full instructions

Add washers and two more wingnuts to each  
bolt as shown. Then thread rubber bands here.
