

1

Insert bolts in pill-shaped slots.
Then add washers and nuts.

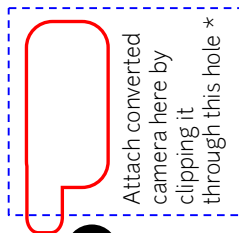

3

Align upper stage
with bottom.

Camera lens should
be flush with stage
as shown.

2

This is an open hardware
design, developed by
hundreds of people
working collaboratively.

CERN OHL 1.2

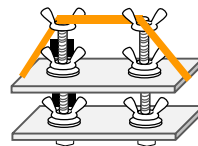

* Visit PublicLab.org/micro for full instructions

Add washers and two more wingnuts to each
bolt as shown. Then thread rubber bands here.

4

5

Clip light on
and aim down
at slide
